

# PHILIPS

hue personal wireless lighting

“Inspire consumers to buy the **light experience**, before the design...”

## Philips Hue | Get more out of your daily routine

***What consumers want?** My home is where I share moments with my family; it's where we try to connect and bond together knowing that every instant is precious. I am aware that the right light can play a key role to support activities at home or to impact how I feel at a moment. There are some products that are doing such things but are either not working together or/and are only for a single purpose. I wish I easily could adapt my lighting to the different activities we want to do at home.*

Philips Hue lights support you in your daily routines. Whether it is in the morning to help you prepare for your workday by providing cool white light to help you **energize**, throughout the day to help you stay **concentrated** on your tasks, **reduce glare** when you are reading or in the evening helping you to **relax, unwind** and prepare for bed. Philips Hue provides **different light settings** to make sure you can get the most out of your day, everyday. Set your settings manually via the app or one of the accessories or automate your lights to get the right light setting for the moment of the day.

Relax with a soft glow of warm white light

Read better with white light

Concentrate longer with finely tuned bright light

Get energized with blue white light

- Easy to install through pre-configured starter kits and a well designed, simple installation process
- Largest portfolio of lights (bulbs, lamps, fixtures)
- **Set your own light setting** by choosing from warm white (yellow color) to cool white (blue white) light
- **Many ways to control**, choose the one you find easiest: app, switch, sensors, remote, timers or voice control
- Use the different pre-set modes to **support your daily activities**
- Works with all main smart home partners (Apple Homekit, Google Home, Amazon Alexa)

## Philips Hue | Wake up and go to sleep

***What consumers want?** It is difficult for me to fall asleep or wake up in the morning and I feel out of sync with my biological clock. I feel tired during the day; this is especially an issue during the dark winter months where there is no sunlight when I wake up. I would love a way to help me maintain a regular sleep routine to go to sleep and wake up more naturally. I wish there was a natural way for me to wake me up refreshed and help me go to sleep easily.*

Philips Hue lights help to support your morning and evening routines. Just set the experience by indicating the time and lights you want to wake up with or help you to prepare for going to sleep. In the morning you will be **waken up in a natural way** as Philips Hue provides you with **light that mimics the sunrise**, slowly increasing in brightness to wake you up refreshed. In the evening Philips Hue helps you **unwind and prepare for sleep** with light that **slowly dims down to a comfortable setting** for you to close your eyes.

Wake up with natural  
sunlight

Prepare for sleep with  
warm white light

Light that slowly dims down to  
unwind and prepare for sleep

- **Select your own light setting** from warm to cool white light
- Many ways to **customize your experience**, choose the one you find easiest: app, switch, sensors, remote, timers or voice control
- Possibility to connect to sleep management third party apps to access more tracking possibilities
- Wake up with one light or several lights in one or multiple rooms
- **Automatically** run a routine once created
- Works with all main smart home partners (Apple Homekit, Google Home, Amazon Alexa)

# Philips Hue | Use Cases

Philips Hue is compatible with voice assistants like Google Assistant, Amazon Alexa and Apple Siri. So, have fun connecting and controlling your Hue lights simply by your voice commands!

## Control Hue lights through Voice Assistants

### Control your lights

Use the Google Assistant to turn your Hue lights on/off, to dim your lights, or to check if you've left any lights on. Simply ask:

- "Ok Google, turn on/off the lights"
- "Ok Google, dim the lights in the bedroom"
- "Hey Google, brighten the living room lights"
- "Hey Google, are the lights on in the kitchen?"

### Scenes and light recipes

You can also set your custom Hue scenes and light recipes with the Google Assistant. To do this, you first need to sync your lights by saying: "Ok Google, Sync my lights". Then ask for your favorite scenes or light recipe as configured in your Hue app:

"Ok Google, turn on tropical twilight in the living room"  
"Hey Google, turn on concentrate in the office"

### Set your favorite colors

Add a splash of color to your home. Just ask the Google Assistant to set your lights to any color you can think of, for example:

- "Ok Google, make the kitchen blue"
- "Ok Google, turn the desk lamp purple"
- "Hey Google, change the lights to green"
- "Hey Google, turn the living room orange"

# Hue vs WiFi

Features/Benefits	WiFi	Philips Hue
Connectivity	Limited by WiFi range. If WiFi signal is weak from where you are operating the app or it is weak where the WiFi bulb is placed, you will encounter glitches in controlling the bulb.	<b>Seamless connectivity</b> as lights are controlled via Hue Bridge (both Hue lights and Hue Bridge are based on Zigbee technology). In a Zigbee system, each light can relay commands to the other lights providing for higher degree of stability. Even if a bulb is placed where WiFi range is weak, the lights can still be controlled as commands can be relayed between Hue lights.
Clogging of WiFi network	Possible if many WiFi bulbs are used together	Philips Hue provides for <b>faster connections</b> and <b>greater coverage without clogging WiFi network</b> (commands executed through ZigBee)
Setup	Need to enter the WiFi password every time a bulb is installed.	Simple process to set up and no need to enter passwords when installing Hue lights
Degree of security	Moderate	High degree of security as Philips Hue is <b>cloud-based</b> which releases security updates of the system regularly. <b>No one can take control of Philips lights even if WiFi is compromised.</b>
Can the lights be synced to movies, music and games?	No	Yes. With Hue Sync app on your desktop/laptop, the <b>lights will sync to movies, music or games being played on the computer</b> and change colors automatically basis the content played.
Compatibility with third-party apps	No	Yes. There are <b>more than 700+ third-party apps</b> with which Philips Hue is compatible. These apps enable a user to experience all the functionalities of Hue system. A few examples given below: <b>Hue Disco</b> - Create a dance floor and sync lights to your music. <b>Huedini</b> - Create relaxing light effect with Hue. <b>Hue Daylight</b> - Let the lights turn on when the Sun sets.
Breadth/Range of Products	Limited to just bulbs and downlights	Philips Hue provides a complete <b>breadth and range</b> of products like Ceiling Lights, Pendants, Bathroom range, Table Lamps, Floor Lamps etc., making it the perfect solution for converting a house into a <b>truly connected Smart Home</b> .
Modes of controlling lights	Through mobile app & voice assistants	<ol style="list-style-type: none"> <li>1. Through mobile app &amp; voice assistants (Amazon Alexa/Apple Homekit/Google Assistant)</li> <li>2. Through <b>Hue Dimmer Switch</b> (for those lazy moments when you simply want to switch off/on Hue lights or dim/brighten them up without using your phone). <b>Particularly useful when WiFi is not working.</b></li> <li>3. Through <b>Hue Sync app</b> for lights to be synced to desktop/laptop content like movies, music and games</li> </ol>
Inter-operability of lights with other devices	Wifi has no interoperability standard. For e.g. no standardized way of turning on the light which makes it difficult to combine WiFi lights from different brands or manufacturers	Zigbee, on which Hue is based, has a common standard for light commands, which enables you to <b>combine other Zigbee devices with Hue lights</b> . For e.g. Amazon Echo Plus can directly be used to control Hue lights and luminaires.

## Hue – Product Range

**PHILIPS** hue personal wireless lighting

## Hue | Bridge

Get started with Philips Hue and control your lights from your smart phone or tablet, or even with your voice. The Philips Hue Bridge is the heart of the system. It unlocks endless possibilities through the Philips Hue app.
